

Standard

$z_i = e(w_i) + p_i$

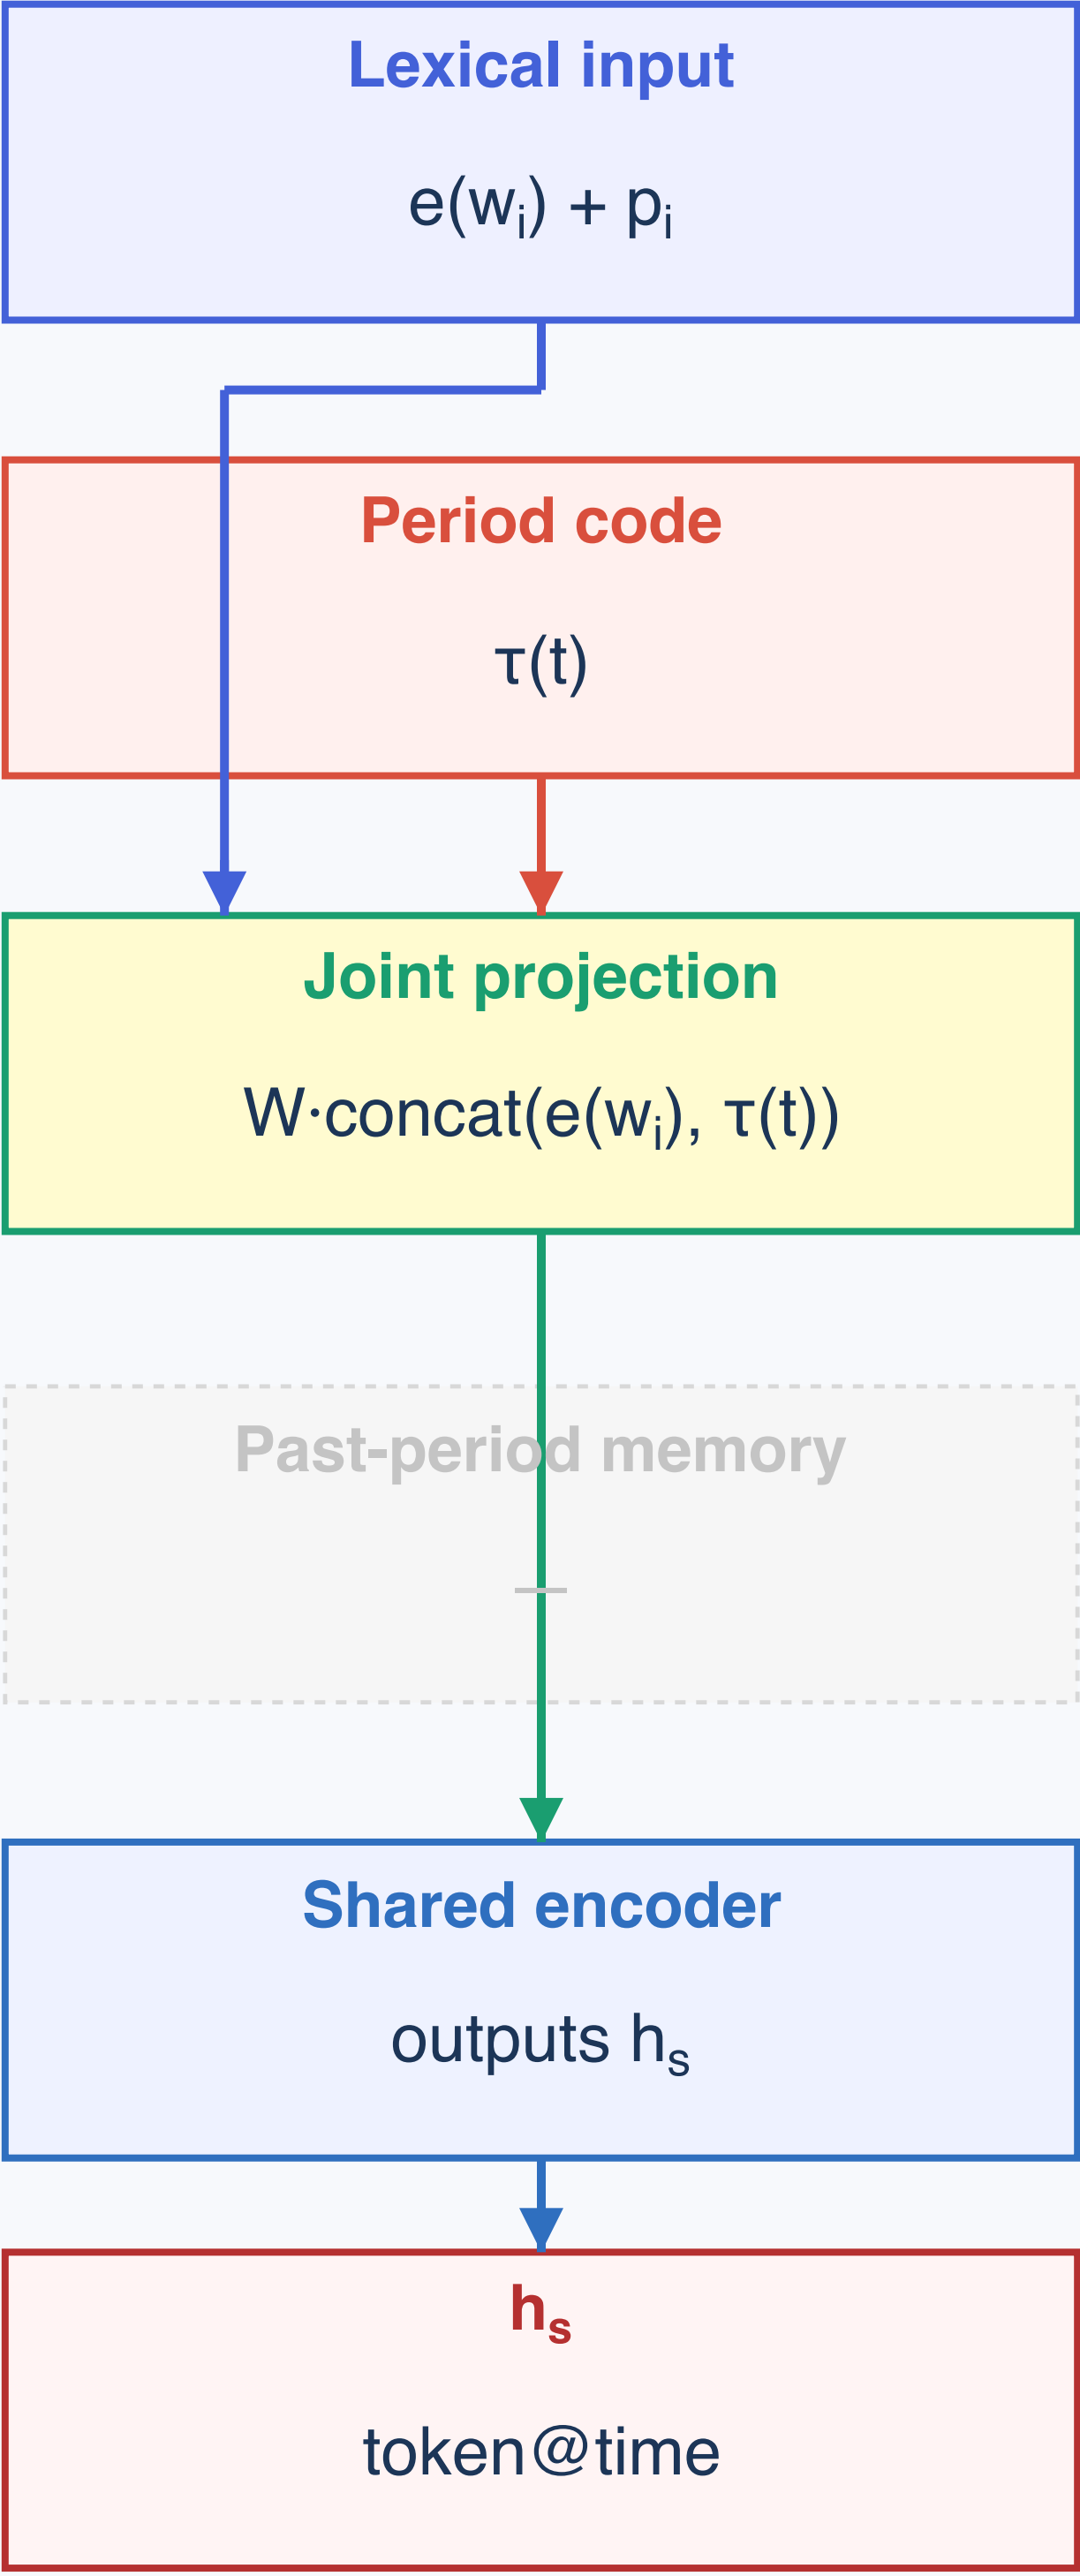

Additive

$z_i = e(w_i) + p_i + \tau(t)$

Token-Time

$z_i = W \cdot \text{concat}(e(w_i), \tau(t)) + p_i$

Memory-Augmented

$\tilde{z}_s = z_s + g \cdot (\text{LN}(z_s + r_s) - z_s)$
